

Consultant Biography

Ernest J. Petkovich, PMP Principal Consultant

Ernie Petkovich is a Principal Consultant at Advanced Management Services, Inc. (AMS), a full service management consultancy servicing an international client base.

Ernie has over 39 years of experience in the information technology industry with expertise in project management, quality initiatives, training, and education management. He has improved client communications, solution development techniques and installation practices that have resulted in lower costs, enhanced resource utilization and increased client satisfaction.

As a Senior Project Consultant for Manatron, Inc., he provided mentoring and quality assurance for multiple solution development and implementation projects in addition to being a driving force in the areas of process and quality improvements. He created a suite of proposal development and project management methodologies including processes and templates that resulted in creation of highly professional proposal and project documents.

He was employed by Unisys Corporation where he managed a number of large scale system integration and Y2K renovation projects for government clients including the State of Massachusetts, the State of Connecticut and the city of Chicago. He also conducted total quality workshops and organized quality teams which resulted in process changes in solution development and technical resource management procedures that helped assure proposed business solutions exceeded client expectations.

He has an Associate in Science degree in computer and information systems from Asnuntuck Community College, and has complemented formal education with extensive corporate training in professional project management practices, current information systems technology, quality management and systems development methodology.

Ernie holds certifications as a Project Management Professional (PMP) and Unisys Certified Project Manager.
