

Course Description

Agile and Integrated Project Management Approach to Information Technology AMS163

28 Professional Development Units
28 Education Hours

Overview

Agile & Integrated Project Management Approach to Information Technology (A&IPMIT) is the culmination of multiple industry experience and proven aspects of what really works in dynamic Information Technology environments. Developed over twenty years as the authors managed and collaborated successfully with many Fortune 500 and other size organizations. In this course, you will learn the concepts and skills necessary to manage or lead your Information Technology, Software, and other Technology projects to success in the least time and at the highest quality.

Learning Objectives

- Explain and use basic A&IPM concepts, processes, and artifacts
- Explain and use basic traditional PMI project management concepts
- Tailor your project processes to use appropriate A&IPM processes and artifacts
- Gain insight into technology project management and many analytical techniques employed
- Understand and define project processes that take less time, effort, and reduce errors
- How and when to negotiate reporting, forms, documents, status reporting, and other levels of process to suit their projects
- How to think about and implement key IT Standards and Methods including: CMM, IEEE, MSF, ITIL, RUP, ISO 9001, Agile and Extreme, and others
- How to define when “good enough” is good enough?
- How best to apply time management
- How to help your teams succeed
- How to reduce the number of and angst involved in your rote project decisions concerning Process, Team norms, and coming to Agreement
- Learn how to establish and sustain a productive and open project communications partnership between you, your team, and your customers

Format

The format of the course is highly interactive and how-to oriented,. Participants are required to par take in this exchange. Discussion of concepts and principles is followed by exercises. The emphasis is on the practical application and adaptation of selected A&IPM tools and processes to your needs and requirements.

Duration

Four days
